VERY STRONG DELEGATION TO CINCINNATI

nual Convention for Improvement of the River.

THE ASSOCIATION CAMPAIGN

Will Include Efforts to Secure Authorization of Three Dams Below Cincinnati.

Last night, via the Baltimore & Ohio Wheeling's delegation to the annual convention of the Ohlo Valley Improvement Association, which is to be held to-day and to-morrow at Cincinnati, left for the Queen City. In the delegation are Congressman B. B. Dovener, Postmaster George Wise, President Hullihen Quarrier, of the chamber of commerce, and Major Randolph Stalnaker.

The association's campaign, now that engineers for Gallipolis and Cincinnati, is to secure dams at three other points further down the river, thus committing the national government to an exten-sion of the slackwater improvement. In this connection, Secretary E. P. Wilson, of the improvement association, recently sent the following to Major W. H. Bixby, the engineer officer of the army in charge of river improvement on the

Secretary Wilson.

CINCINNATI, O., Nov. 2,1900. Major William H. Bixby, Corps of En-glacers, U. S. A., Government Build-ing, Cincinnati.

ing, Cincinnati.

MY DEAR SIR:—If consistent to furnish me information in reply to the following inquiries, you will greatly oblige:

First—Are you sufficiently advised to express an opinion as to whether a lock and moveable dam located below the mouth of Salt river, would have the effect of raising the waters of Salt river to a navigable stage, and creating a storage pool in the Ohlo, which would reach the mouth of the Louisville canal?

Second—Can we continued to the continue

nal?
Second—Can you give me an idea of the practical effect upon the harbors at Evansville and Henderson, and upon the outlet of Green river, which would follow the construction of a lock and moveable dam near, or below, Henderson?

son?
Third—Will you similarly advise me as to the physical and commercial effect of the location of a lock and moveable dam below Brooklyn, on the Ohio

able dam below Brooklyn, on the Ohlo
river, as to its effect upon the harbor
of Brooklyn, Paducah and the mouth of
the Tennessee?

Is it possible to forecast that the improvements above referred to, would be
so located as to become a part of the
general scheme of improvement now in
progress, which has for its object the
securing of a minimum depth of six
feet between Pittsburgh and Cairo?

Any light which you can consistently
throw upon this subject, would be of
great present interest to the members
of this association.

Yours very truly,
E. P. WILSON,
Secretary, Ohlo Valley Improvement
Association.

The Reply.

The Reply.

Major Bixby's reply was as follows CINCINNATI, O., Nov. 3, 1900. Mr. E. P. Wilson, Secretary, Ohio Val-ley Improvement Association, Cincin-nati, O.

nati, O. SIR:—Yours of November 2 is duly received, making inquiries regarding the usefulness and practicability of dams in the Ohio river at points below Salt river, below Henderson, and below Banklyin.

Brooklyn.

Each dam as now proposed for use in the Ohlo river above the mouth of the Big Miami. Is Intended to be so arranged as to raise the water about eight feet at each dam, and to give at least a depth of six feet in the harbor or pool thereby formed above such dam.

Between Louisville and Salt river, the present river slope at a low water stage is about seven feet in twenty miles; between feet in twenty miles; between feet in twenty miles, between feet in twenty miles, between the mouth of the Cumberland river and Brooklyn, about three or four feet in twenty miles. A dam of about eight feet in height in the Ohlo river just below the mouth of the Salt river would therefore probably back the water for fifteen or twenty miles up Salt river, and for about thirty-four miles up the Ohlo river, to probably the foot of the Louisville canal, so as to insure six feet depth throughout the pool thus established. A similar dum below Henderson, derson would probably form a similar pool of about thirty to forty miles length, so as to include Henderson, Evansville, and the Green river up to the foot of the lowest lock and dam on that river. A similar dam below Brooklyn would form a pool of probably over forty miles in length, so as to include Brooklyn harbor, Paducah harbor, the mouth of the Tennessee, and the mouth of the Cumberland. At each place these pools would give deep water over a great many shoals now exceedingly troublesome.

Danns as above described could probably over forty miles in length, so as to include Brooklyn harbor, Paducah harbor, the mouth of the Tennessee, and the mouth of the Cumberland. At each place these pools would give deep water over a great many shoals now exceedingly troublesome.

Danns as above described could probably be located so as to become a part of the general scheme of improvement now authorized by Congress from Marletta, to the mouth of the Big Miland, the Indiana state line. So far as now seen, the constructions of such deman rivers and intention of congress from Marletta, to th

ongress on its request, will natur-follow closely upon the completion

ally follow closely upon the composition of the survey.

The desirability of such a survey is a matter to be settled by Congress through its representaives, in response to the requests of their constituents, accompanied by reasonable proof of the necessity, importance and value of such work to the public at large.

Very respectfully,

W. H. BIXBY,

Major, Corps of Engineers, U. S. A.

ple and Visitors.

PERSONAL NOTES. Going and Coming of Wheeling Peo-

ple and Visitors.

Colonel William Ellingham and Mr. Edward C. Flaccus left last night for the North Glade Fishing Club's game preserves, near Mountain Lake Park, and expect to have a week of fine enjoyment in the Nimrod line. Messrs. C. H. Copp, John Waterhouse, and James P. Maxwell, other members of the club, have just returned, and report unexcelled sport, both in hunting and fishing. Mr. James Nelli, who returned a few days ago, said he never saw so many pheasants as there are on the North Glade preserves. The club considers itself extremely fortunate that it secured such a fine property.

B. A. Reese, Milt McCracken, J. E. Crase, Arthur Moord and Frank Dankin were Cameron callers in the city yesterday.

Among the West Virginians at the Park hotel yesterday were Dr. L. B Bryns, of Falrmont; G. W. Nelson, of Morgantown; W. F. Clark, of Sisters-ville, and W. L. Strorker, of Salem.

Among the state arrivals at the Stamm yesterday were J. Koontz, of New Martinsville; R. B. Cotton, of Wellsburg; Mrs. Edna Holly, of Mannington, and A. M. Fressel, of Glen Easton.

Karl C. Banks, of Pittsburgh, was in the city last night, arranging for the first of the "recital series" of musical entertainment to be given here this season under the auspices of Mr. C. N. Boyd.

"CHILDREN AND FOOLS"

" Judge of a Thing Half Done."

This is particularly applicable in cases where persons seriously troubled from take up Postum Food Coffee in its place, attempt to make the new beverage with a little hot water and two or three minutes' boiling. That sort of a "lick and a promise" produces a drink that is simply exasperating. It is flat and tasteless, whereas the persoit who will boil the Postum full affecen minutes after the actual bubbling and boiling begins, will have a beverage that is something.

There is a point between twelve and fifteen minutes of boiling when the character of Postum is changed, the fed value is extracted and the delicious age with a little hot water and two or

ing begins, win have a beverage that is something.

There is a point between twelve and fifteen minutes of boiling when the character of Postum is changed, the fod value is extracted and the delicious flavor which much resembles the milder and more expensive grades of Java coffee is produced.

A lady in Salem, Orc., says: "Whenever I drank coffee at night, I always passed a restless, wakeful night. Extreme nervousness and a weak stomach have followed me ever since I have been using coffee. Finally I got into such a state that my dyspepsia took the form of spasms and heart weakness." I suffered intensely, and when a physician was called, he inquired, among other things, if I drank coffee, and insisted that I leave it off. I did so and took up tea, which I found almost as bad. Finally husband brought home a package of Postum, and we tried it (strictly according to directions, for we-believe in the adage that 'Children and fools judge of a thing half done'). "The new coffee was delicious and from that day until now (which is a year) it has been our only drink at meals, My dyspepsia, spasms, etc., are a thing of the past. My husband had suffered some years with billious headache and indigestion, but during the past year, on Postum Fod Coffee, he has entirely recovered his health and gained much in weight. Our friends frequently comment on our improved appearance and change in complexion." Name of writer supplied by Postum Co., Battle Creek, Mich.
